Profile

A motivated and optimistic student pursuing B.tech in Applied Electronics. My strong points are being calm under pressure, life long learner, I don't shy away from problems until its solved, my moto is "Action speak louder than words" so I try to do things that give results rather than just talking and speculating about them. I am looking to work in a dynamic environment where I can learn new skills and also do some good for society as a whole.

Skills

Python

Tensorflow, Pandas, Numpy
